

PTO SCIENCE NIGHT

Dream Catchers and the WLCSD PTO joined forces to co-sponsor Science Night (Noche de Ciencias) on April 25, 2019. It was a very engaging evening; everyone who attended spent at least 90 minutes at the event. The offerings were interactive: children peered into microscopes, examined their hands under black light after using hand sanitizer, performed small experiments such as how many drops of water they could collect on a penny, held a live snake, made and tested paper airplanes, made slime, tested their engineering skills with an egg drop, learned about density of various liquids, walked a plank from a skyscraper in virtual reality, used pipettes, made DNA bracelets, watched a demonstration of Charles' law, won prizes made by a 3-D printer, learned facts about corn and make air-launched rockets. How wonderful it was to observe children enjoying science. Here is a link to a webpage with links to videos of the event: https://docs.google.com/document/d/1isCEL-9EXVwmT7S8yAgK_5Bf-Tk8ccB-8ZFtkNA-tns/edit?usp=sharing.
